SKILLS

JavaScript | Typescript | OOP | React native | ReactJS | Redux | NextJS | NodeJS | ExpressJS | MongoDB | Mongoose | Git | MVC | English, Bengali - *All professional proficiency or above*

WORK EXPERIENCE

My Next Film | 06-2022 to Present*Full Stack Web Developer*

- Designed and developed dynamic web applications, delivering seamless user experiences through modern technologies like React.js and Node.js.
- Integrated secure payment gateways (Stripe and Razorpay) to enable efficient global and local transactions.
- Refactored legacy code and optimized server performance, reducing server load by 20%.
- Built AI-driven features to enhance user engagement and foster creativity.
- Collaborated with cross-functional teams to implement scalable, high-performance solutions aligned with business goals.

PROJECTS

UNIVERSITY MANAGEMENT SYSTEM

GitHub: [Backend](#) | [Live Link](#)

A web-based platform for managing university operations, including user authentication, profile management, and academic processes.

• Key Features:

- Authentication: Secure login, password updates, and resets for students, faculty, and admin.
- Profile Management: Role-specific profile updates for all users.

• Academic Processes:

- Students: Course enrollment, schedule, grades, and notices.
- Faculty: Grade management and access to student data.
- Admin: Management of semesters, courses, sections, and resources.

- User Management: Admins can manage accounts, block/unblock users, and reset passwords.
- Complete Web Development, Programming Hero, 01/2022-06/2022
- Technologies Used: Node.js, Express, MongoDB, Mongoose, Authentication & Authorization.

The Gadget Galaxy

GitHub: [Frontend](#) | | [Backend](#) | | [Live Link](#)

- **Description:** Developed a comprehensive e-commerce platform using Next.js for the front-end and Node.js for the back-end. Gadget Galaxy is a dynamic online marketplace where users can explore, purchase a wide range of electronic products, and manage their orders seamlessly. Administrators have robust capabilities to oversee the platform, including adding, updating, and deleting products, as well as reviewing and managing user orders.
- **Key Features:**
 - Front-End: Created an engaging user interface with Next.js, offering an intuitive shopping experience with responsive design and smooth navigation.
 - Back-End: Built a secure and scalable Node.js server that handles user authentication, product management, and order processing.
 - User Functionality: Enabled users to register, browse products, add items to their cart, and complete purchases securely.
- **Technologies Used:** Next.js, Node.js, Express, MongoDB, JavaScript, HTML, CSS, RESTful API, Authentication & Authorization.
